# RUSHIKESH GADEKAR

+91-9527693711 | rushikeshgadekar2105@gmail.com | linkedin.com/in/rushikesh-gadekar-568077260

## EDUCATION

**MIT-World Peace University (MIT-WPU)** — Jun 2023 – Present
B.Sc. Computer Science – Cloud Computing (CGPA: 8.52/10) — Pune, India
*Relevant Courses: Big Data Analytics, Cloud Computing (AWS, Azure, Google Cloud), DBMS*

**Sir Parashurambhau Jr. College** — Jun 2021 – Mar 2023
Higher Secondary – Science — Pune, India

## TECHNICAL SKILLS

**Languages & Query:** Python, SQL, Java, C, C++
**Data & Analytics:** MySQL, XAMPP (phpMyAdmin), NumPy, Pandas, Advanced Excel, Tableau
**Cloud & Infrastructure:** AWS, VS Code, Git
**Web Development:** HTML, CSS, JavaScript, React, WordPress, Elementor
**Core Concepts:** DSA, OOP, Relational Database Design, Data Normalization, Indexing

## PROFESSIONAL EXPERIENCE

**GAO TEK INC.** — USA & Canada
*Web Developer* — Oct 2025 – Jan 2026

- Designed and structured relational database tables for user, transaction, and order data — ensuring data integrity, normalized schema, and efficient retrieval for a live production environment.
- Wrote optimized SQL queries for data insertion, filtering, and analysis, reducing query execution time and improving backend data processing efficiency.
- Maintained and enhanced the company website using WordPress and Elementor, improving site usability, navigation consistency, and cross-device performance across responsive UI components built with HTML, CSS, and JavaScript.

## PROJECTS

**Tripsync: AI Itinerary & Expense Planner** | *React, TypeScript, MySQL, AWS*

- Designed and implemented a normalized MySQL schema to handle user profiles, trip records, and expense entries ensuring efficient relational data storage and retrieval for a multi-user web application.
- Built an AI-based itinerary generation module that processes user inputs (preferences, budget, duration) to produce personalized travel plans, applying data-driven logic to reduce manual trip-planning effort.
- Developed a real-time expense tracking and splitting module that calculates user balances and minimizes payment conflicts across group members, demonstrating applied business process automation.
- Integrated frontend (React/TypeScript) with AWS-hosted backend to ensure smooth data flow and consistent user experience across devices.

**Student Management System** | *Java, MySQL*

- Designed a fully normalized relational database schema with indexing techniques to optimize query performance across student records, attendance, and grading data.
- Enhanced complex SQL queries for academic report generation, enabling granular performance tracking by student, subject, and time period.
- Implemented complete CRUD operations supporting efficient creation, updating, and retrieval of student data — reducing administrative workflow overhead.

## CERTIFICATION

**Machine Learning & Deep Learning – NIT Goa under MIT-WPU (2025)**

- Completed a structured program covering supervised and unsupervised learning and deep learning fundamentals; built hands-on ML models and applied them to practical datasets.

## EXTRACURRICULAR ACTIVITIES

- Coordinating educational programs, health camps, and community outreach initiatives as a volunteer with Lions International Club of Pune Unique (NGO), mobilizing 50+ volunteers to serve underprivileged communities across India (2021–Present).
- Accomplished a Guinness World Record for the 'Largest Personality Development & Confidence Building Workshop' (Multiple Venues) under the 'YouthForU' initiative with Mihika Bhanot Image Consultancy, Pune (2018).
